- **Source Control:**   TFS

- **Databases:**   SQL Server

3

- **Mobile Programming:**   Apache Cordova

RESPONSIBILITIES

I have worked at mostly startups and have been an individual contributor in my career path. In **Primaseller** I setup the complete front end framework when we migrated from .net to front end in Backbone.js.

In PayU Payments independently developed the Selfie platform along with a few Backend developers. We moved from Angular.js to React.js the PayUmoney platform was an important team member in that process as well.
